* Currently the monthly pricing is \$30 for 10 purchase orders and 1000 reorder points. 10 purchase orders and 1000 reorder points per month are included; each additional 10 purchase orders is \$5 per month and each additional 1000 reorder points is \$5 per month. Terms, conditions, pricing, features, service and support are subject to change without notice.

** Pricing based on 10/10 comparison of RightOn Inventory Order Management vs QuickBooks, EZ Analytics, Fishbowl, and ACCTivate. Monthly fee based on 10 purchase orders and 1000 reorder points filed electronically per month. With RightOn Inventory Order Management, your purchase order forms and report forms are created for you, whereas with EZ Analytics, Fishbowl, and ACCTivate, the entire inventory order management process, creating purchase orders and setting reorder points are based on manual settings.

*** Not all calculations are the same. Only RightOn Inventory Order Management calculates inventory levels at maximum economic value added - your peak financial performance. QuickBooks requires exporting and importing data to Microsoft Excel. EZ Analytics uses a manual setting of days of demand in their calculations. Fishbowl uses a manual setting for lead-time from your vendors in their calculations. ACCTivate uses manual settings minimum, maximum, and reserve stock in their calculations.

Feature Highlights

We automate the task of managing inventory orders

- Taking the guess work out of ordering inventory
- Setting reorder points at peak financial performance

Prior to our product

- Customers were guessing how much inventory to keep in stock
 - Most set reorder points manually – a tedious one at a time task
 - Some ran reports on Excel spreadsheets with settings that were arbitrary and difficult to undo in QuickBooks
- Customers were guessing how much inventory to order
 - Most spent time reviewing multiple reports before manually creating purchase orders.
 - Some ran reports on Excel spreadsheets

We make it easy to manage inventory. We save the customers time and money so they can focus on growing their businesses

RightOn Inventory Order Management

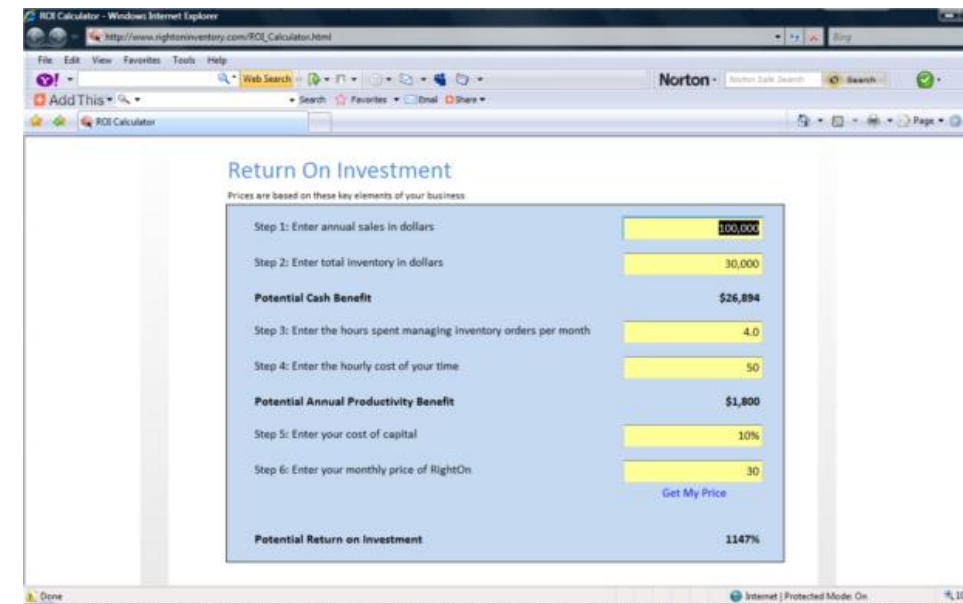

Inventory ordering made easy. Inventory management done right.

Overview

RightOn Inventory allows you to create purchase orders and update reorder points in minutes. There is no software to install; data is stored through Intuit's Workplace App Center and Microsoft's Windows Azure.

Regularly receive email alerts from RightOn to review purchase orders and reorder points, make adjustments and click to approve.

Updating reorder points is fast and easy. We do the calculations and file all the forms to QuickBooks. You control when they are updated. Click to file, print, and/or email directly to vendors.
